It made potions/poisons with three effects and, before the HearthFire add-on, was the only most expensive potion one could make. In addition to being a good way to make money, the increase in skills is a great way to quickly increase your alchemy skills, as they are directly proportional to the value of the potions created. Effect: Damage Stamina Regen + Fortify Health + Fortify Carry Weight. A well-known multipurpose potion is the Creep Cluster + The Great Antlers + Betty River. However, merchants do not stock antlers, so it is more difficult to get the ingredients. Effect: Damage Stamina Regen + Fortify Carry Weight + Slow. AnotherPotions can be done with bee hive shells, bear claws, and hawk feathers. The resulting potions include Fortify Sneak, Fortify Light Armor, and Fortify One-Hand Skills. It is a very useful potion for assassins. Restoring stamina, restoring magicka, and combining ingredients that produce multiple effects most commonly occurring effects on alchemy ingredients restoring health is therefore simple if any of the above effects are restoration diversity ones. The most expensive potions ever found are using histocarp, jazz bay grapes and salmon roe. The result is water respiration, Fortify Magica, Fortly Magica playback, and stamina restoration. With the right perks and gear, one potion is worth more than 10,000. Using Morata Pinera, Scully Foliota and Creep Clusters grant potions with at least five effects. Other ingredients that produce serum of five effects are: glow dust, glowing mushrooms, hanging moskma claws, saber cat eyes, hanging moss Daedra heart, sabercat eyes, silver side perchid warben oil, richter and watchers eye. Crimson Nirnroot and Nirnroot grant potions with four effects: Damage Health, Damage Stamina, Invisible and Resist Magic. Both are nirnroots, so their éphecies are shared. Trivia [Edit| Edit Source] All effects can be enhanced using enchanted armor and clothing. The item models used for the potions and poisons made are borrowed from minor healing and weak stamina poison potions, respectively. Potion of minor healing model. Weak stamina poison model. Bugs [Edit| Edit Source] This section contains bugs related to the created potions (Skyrim). Before you add a bug to this list, consider the following: Reload the old save to see if the bug is still happening. If the bug is still occurring, please post the bug report on the appropriate system template 360/XB1, PS3/PS4, PC/MAC, NX, depending on the platform on which the bug occurred. Write a description when describing bugs or fixes, but avoid having conversations in descriptions or first-person anecdotes: such discussions belong to the appropriate forum board. If dragonbones have two void salts listed separately on the menu, they can make potions with both of them and giant lichen planus, resulting in a potion of weakness that shocks poison damage.
